

Asphalt - Quick Reference Guide

The requirements for detailing asphalt documentation provides for a series of records to be completed at the conclusion of the project.

- Contractor Superpave Software (with Density Results)
- Random Sampling Schedule
- Asphalt Mix Design(s)
- QA Summary of Tests

NDOR field personnel shall, after the completion of all asphalt, obtain the Contractor Superpave Software (with Density Results) from the contractor. NDOR field personnel shall then notify the NDOR Bituminous-Aggregate Laboratory of the location of the Contractor Superpave Software and the Random Sampling Schedule (RSS) on the shared drive in S:\Contract_Docs .

At the completion of the project, the NDOR Bituminous-Aggregate Laboratory is responsible for finalizing the Asphalt Mix Designs and Quality Assurance Summary of Tests.

Once notified, the NDOR Bituminous-Aggregate Laboratory will compile the documents, create and authorize the SiteManager sample record, and alert the NDOR field personnel that the documentation requirements have been fulfilled.

Material Code, Name, and Description:

503A0101 - Asphaltic Concrete
